INTRODUCTION

WIKĘD is a Polish manufacturer of windows and exterior doors for houses and apartments. In a factory located in Luzino in northern Poland there are currently over 400 employees.

The brand was founded in 2002 and in for two decades now constantly improves its products.

WIKĘD is the leader in the exterior doors market in Poland, receiving numerous awards and distinctions in rankings.

MODEL 48 / DOOR BAR TORO / WOODEC OAK TURNER / DEERSTONE FRAME FOR GLASS

ABOUT US

Our doors open millions of homes

WIKĘD gives you unlimited possibilities of choosing and personalizing the door for your home. The unique variety and the multitude of possibilities for new solutions will emphasize the individual style. We use proven technologies for the production of our doors, which, combined with a modern machine park, allows us to produce doors for the most demanding customers.

TECHNOLOGY

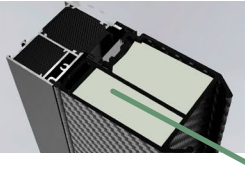

ALU HYBRID

The flush-mounted seamless ALU HYBRID door is a combination of two proven technologies used so far in the WIKĘD door - a reliable, warm and slender aluminum frame and a super-durable glass fiber composite with a carbon coating with excellent thermal and static parameters, which is the core of the door. The new technology allows you to create doors that are flush on both sides with a door-leaf made of two aluminum sheets which combined creates the highest product class.

**ALU
HYBRID**

The combination of aluminum technology and carbon structured fiberglass allows to achieve an effect of a door-leaf flush on both sides. The new design composed with the most demanding tastes in mind, perfectly matches the current architectural trends.

GLASS
DESIGN

The Black glazing in the Glass Design door collection is very reflective. The presented doors feature full-height glass, which gave this unique visual effect.

COLLECTION

GLASS DESIGN

GLASS DESIGN exterior doors are a very attractive proposition of a modern, refined design.

This collection is distinguished by exceptional attention to every detail. Door leaf and the glass pane form a uniform plane from the outside as well as inside of the house.

GLASS
LOFT

The GLASS LOFT collection is a perfect example of the possibility of combining the Black glass along the entire height of the door leaf with the latest model of this collection and with an individual color.

COLLECTION GLASSLOFT

Exterior doors from the GLASS LOFT collection fascinate with the panes of glass applied directly on the door leaf with a built-in glazing unit. Under the black, Lacobel glass we placed translucent glass.

GLASS FRONT

The GLASS FRONT collection has been expanded with two original designs, with an interestingly placed glass pane on the surface. For the first time, we installed the Alfa DOOR-BAR to adjust it to individuality in design.

COLLECTION GLASSFRONT

GLASS FRONT exterior doors collection is distinguished by a deeply black glass pane. Black glass is applied directly onto the full door leaf giving a realistic glazing effect.

Future
INOX

Door leaf coat and decorative elements from the Future INOX collection are made entirely of aluminum.

Through this doors are exceptionally durable and feature very good protection against weather conditions.

MODEL FI11 / COLOR WINCHESTER / DOOR-BAR TORO / SIDELIGHT WITH ONE WAY MIRROR

COLLECTION

FutureINOX

FUTURE INOX aluminum doors are completely smooth. Glazing and decorative aluminum frames are fitted perfectly with the door surface. These details reflect the whole idea of the Future INOX collection.

The unique variety of classic WIKĘD external doors gives practically unlimited possibilities, options and variation of personalization. Create the perfect solution for yourself using our configurator available on website www.wiked.pl

COLLECTION

Classic Models

Classic doors can be divided into two types: the former, comprised of models with lower numbering will work great in classic construction, where elegance and timelessness are the most valued style. The latter are characterized by simplicity in shapes, these are the doors for lovers of simple, modern and functional style.

EXTERIOR DOORS

DOOR CONSTRUCTION AND TECHNOLOGY

ALU HYBRID

The flush-mounted seamless ALU HYBRID door is a combination of two proven technologies used so far in the WIKĘD door - a reliable, warm and slender aluminum frame and a super-durable glass fiber composite with a carbon coating with excellent thermal and static parameters, which is the core of the door. The new technology allows you to create doors that are flush on both sides with a door-leaf made of two aluminum sheets which combined creates the highest product class.

Heat transmittance coefficient
 $U_d=0,54 \text{ W/m}^2\text{K}^*$

Door leaf thickness

Acoustic isolation
30dB*

Security class RC2**

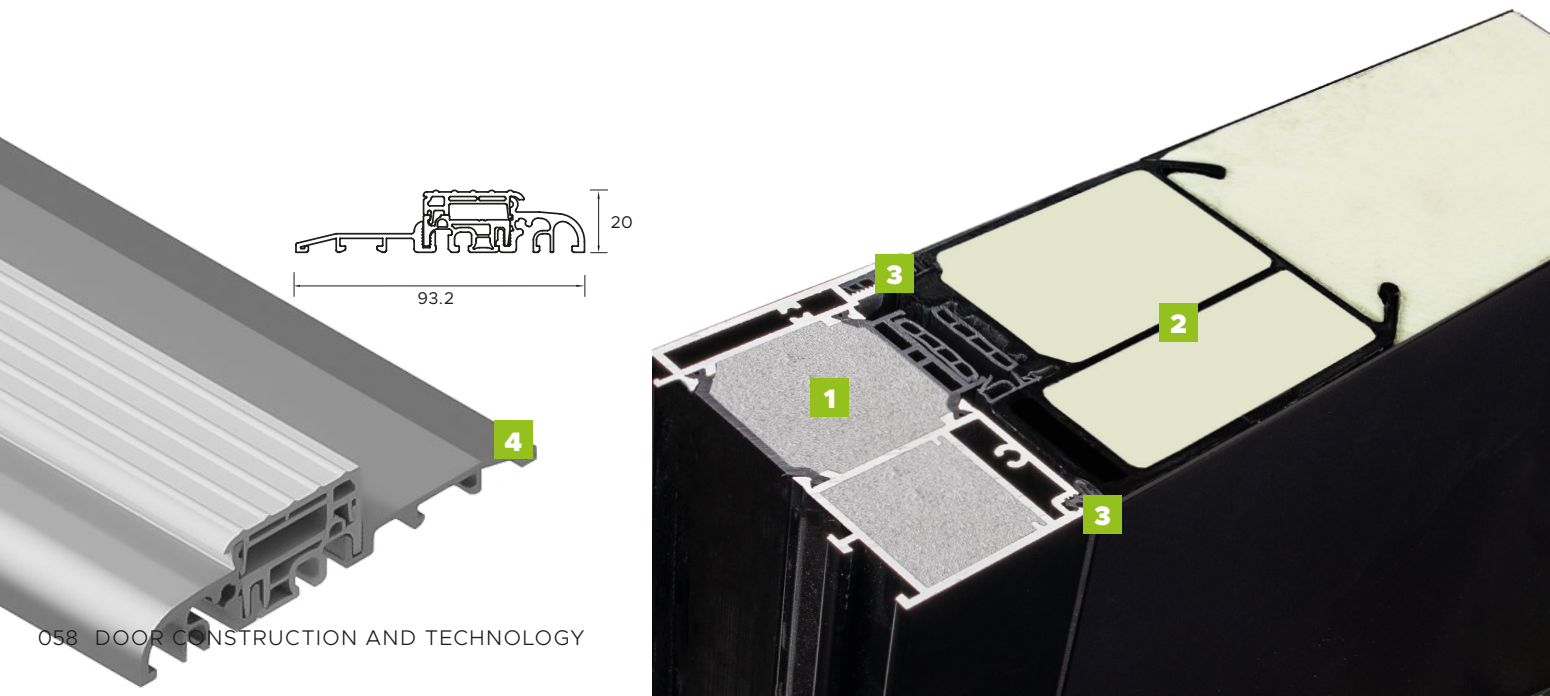

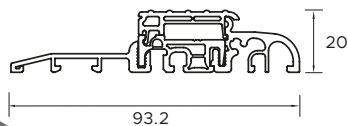

* Only doors without glazing

**IAW PN-EN 1627:2011. Only for full doors or with P4 glazing and INOX decor and fitted with C class lock and HANDLE

DOOR CONSTRUCTION

- ALU HYBRID insulated door frame with an XPS insert that improves thermal performance. **1**
- Door leaf made of fiberglass composite with carbon structure and filled with polyurethane foam with a composite frame. **2**
- Door leaf with peripheral seal and an additional masking trim. **3**
- Door leaf with peripheral seal and an additional masking trim.
- Three 3D hinges adjustable in 3 dimensions.
- 8-point locking mechanism (hook-bolts).
- Lower and upper points controlled with the main lock
- Clamping bar over the entire height of the of the frame.
- LAVA handles.
- Burglar-resistant cylinder-lock or double-sided cylinder (security class "D").
- Custom **WIKĘD** key.
- Minimalist ring door lock cover (with DOOR-BAR).
- Insulated PVC/ALU threshold with thermal partition. **4**

Termo Prestige Lux

A range of advanced entrance doors for very demanding customers. A wide choice of pattern configurations and accessories, combined with excellent technical parameters, guarantee perfect thermal and acoustic insulation values.

Heat transmittance coefficient
 $U_d=0,79 \text{ W/m}^2\text{K}^*$

Door leaf thickness

Acoustic isolation
32dB*

Security class RC2**

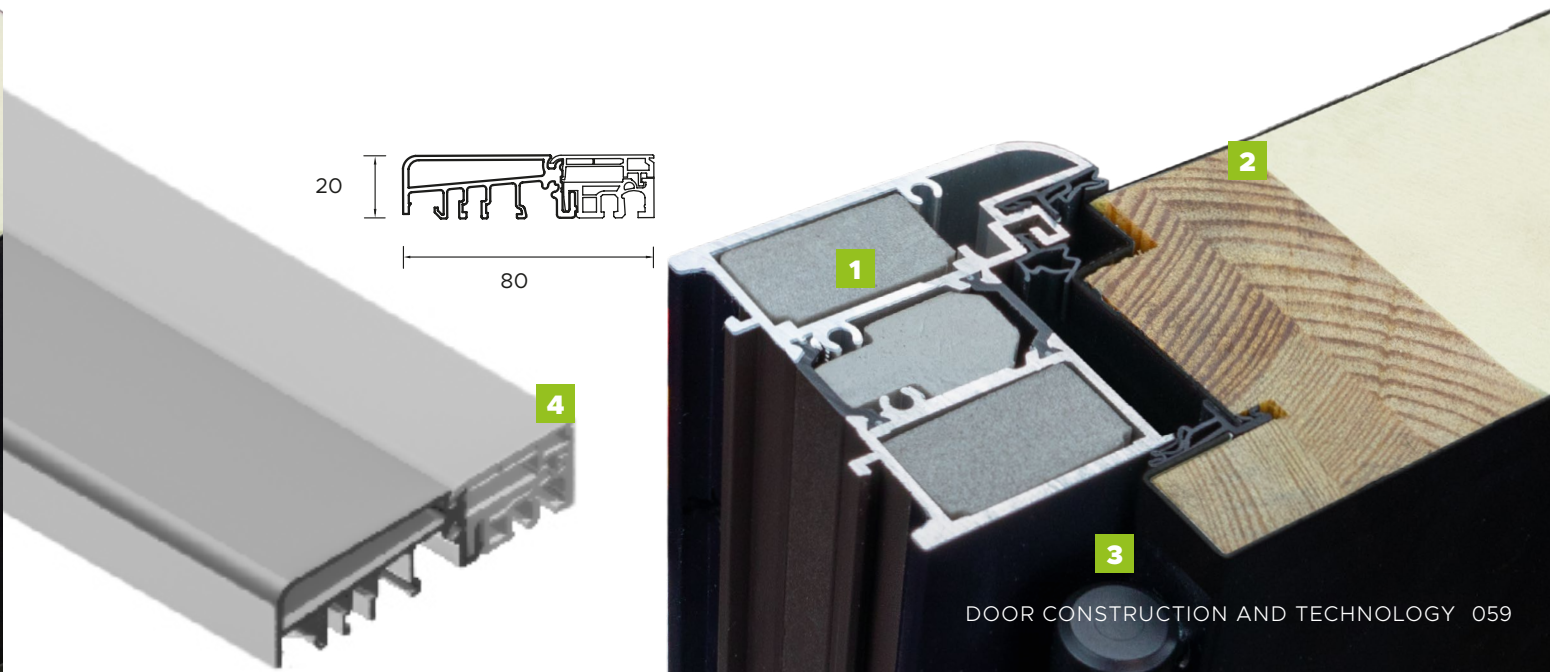

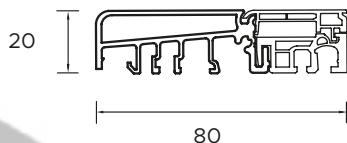

* Only doors without glazing

**IAW PN-EN 1627:2011. Only for full doors or with P4 glazing and INOX decor and fitted with C class lock and HANDLE

DOOR CONSTRUCTION

- Warm Termo Prestige frame with two seals and insulating filler in each chamber. **1**
- Door leaf with seal, filled with polyurethane foam and glued laminated timber frame. **2**
- 3 3D hinges adjustable in 3 dimensions. **3**
- Adjustable pressure for 3-point lock system.
- 6 anti-breach bolts.
- Key operated upper bolt with additional upper latch bolt.
- double cylinder lock or knob cylinder.
- 3-point lock with main lock and central latch bolt.
- Prime, Tahoma, Manitoba or Magnus HANDLE.
- Key operated lower bolt with additional lower latch bolt.
- Door leaf with 4-sided seal.
- Auto drop down seal.
- Windstoper (seal preventing potential drafts in threshold section).
- Warm, PVC/ALU threshold with thermal barrier. **4**

Optimum

The optimum range of entrance doors for demanding customers.
A wide range of visual and technical solutions combined with very good value for money.

Register your installed door via the QR code on the nameplate or do so via our website.

For more information, please visit our website and our professional showrooms.

Create the door of your dreams with our customizer.

We thank you for your confidence and the motivation for further development.

In this catalog of the entrance doors collection 2022, we have presented several new products and inspiring solutions, which constitute a small part of all our production capabilities.

You can be sure that in our offer you will find everything you need - from functional and minimalist basic products to innovative, modern designs and the most sophisticated doors.

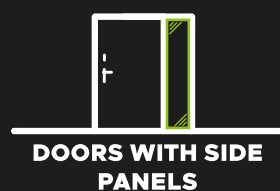

Due to technical limitations of printing and glazing manufacturing technology, patterns and colors may vary from actual. Photos are for illustrative purposes only. The door embossing is shallow. Due to the technology used, the outline of structural elements around the perimeter of the door leaf may be visible. This mainly applies to dark colors and doors painted in the RAL palette. Do not install dark color doors in areas exposed to direct and prolonged sunlight. Doors installed as exterior entry doors in locations exposed to direct weather conditions (rain, wind, etc.) must be outward opening doors. A roof is required for doors installed as exterior entry doors.
